I'm a frontend engineer with over two years of experience in web development at MadDevs. My primary areas of focus and expertise are JavaScript, TypeScript, React/Redux and NextJS.

Professional Experience

May 2021 - Present

MadDevs, Bishkek, Kyrgyzstan

Frontend developer

Frontend development and production environment support for enji.ai

- Migrated a web application from vue 2 to vue 3
- Development and support of the personal panel
- Increased the creation of forms on the frontend by ~3 times
- Developed a custom table for financial reports

HTML SCSS TypeScript Vue3.js/Quasar

Sep 2021 - Aug 2022

MadDevs, Bishkek, Kyrgyzstan

Frontend developer

Frontend and backend development and support for website maddevs.io:

- Supported for website development using Vue2.js/Nuxt.js
- Created slices for build pages via Prismic CMS
- Wrote unit tests to the logic and components using jest engine, vue-test-library, vue-test-utils

Frontend and backend development and support for radiator app (use to get metrics from Google Analytics, Quora, Glassdoor, etc. and send to Slack channel as a report):

- Created UI by using ReactJS and AntDesign library
- Supported the backend when adding new functionality
- Supported migrations when changing the database

Education

Masters degree in Radio engineering. Omsk State Technical University (OmSTU) [2011 – 2013]

Additional Experience

Web development

- In my spare time I develop my website <http://railbatyrshin.me> using modern technologies to improve my hard skills. To create articles I'll use the Prismic CMS.
- Some of my interests and hobbies revolve around GitHub and open source community. A complete list of side/hobby projects: <https://github.com/TangoPJ>
